# READY-TO-LAY PULLETS (18 to 20 weeks old)

### SMALL ORDER CHARGES:

Add \$8.00 for orders less than 10 of any one age group

**NOTE: You must provide your own containers**

“READY-TO-LAY” refers to pullets that are at the maturing stage (age and weight), and will usually start laying within 2 to 4 weeks if proper management and environmental conditions are adhered to.

READY-TO-LAY PULLETS			PULLETS				COCKERELS (Limited availability)
			2-19	20-49	50-99	100	
RTL-RSL	Red Sex-Link (best egg layer)		11.15	10.65	10.15	9.90	10.15
RTL-V	Layer Variety (3 different breeds or more) *	Minimum quantity 6	12.15	11.65	11.15	10.90	11.15
RTL-BR	Barred Rock *	} Minimum quantity 6 total	13.15	12.65	12.15	11.90	12.15
RTL-CRX	Columbian Rock X *						
RTL-BSL	Black Sex-Link *						

\* **Please note** that these breeds mature several weeks slower than the Red Sex-Link and they will not produce as many eggs, even in proper conditions.

All RTL are beak trimmed at day old or 6 weeks old to help prevent picking and egg breakage. Beak trimming still allows the hens to “scratch” feed or range.

Pullets will have been on 12 hours of light per day when you receive them. Increase ½ to 1 hour per week until you reach 16 hours of light per day. Total hours of light per day and proper nutrition (no scratch or “green scraps”) will bring the pullets into lay. Greens and scratch may be given at a later age, however, if birds have access to these feed sources we recommend a vitamin supplement in the water to prevent a nutritional deficiency. As well, if you plan to allow your pullets access to the outdoors, consider putting a “wormer” medication in the water (1 or 2 application days – available from your feed supplier).

New and used crates are available for purchase. We do not rent or lend crates.

Ready-to-Lays	1-49	50+
Brown Pullets	10.55	10.15
White Pullets	10.25	9.85

\*\*Pullets Plus Ready-to-Lays available year-round. Please call Nature Feed Centre for delivery dates\*\*
